*List of our capabilities & services to fellow **Contractors,**
Realtors, Farms, Homeowners, Homeowner Associations
& Property Managers in RVA Tri-City area.*

We Install and maintain Gravel Roads and residential driveways.

**Light Hauling and a bunch of other stuff you might need one day
Have a look and put this detail in a folder please. We can use
the work!**

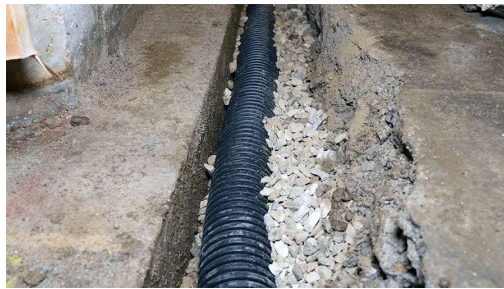

Grading & gravel Entrance road maintenance and installation:
We use a land planer to regrade gravel or cut in new roads. Fast efficient and accurate. We haul our own gravel unless its a larger road contract and then we have two trucking contractors in Dinwiddie we use. The landplaner Recycles existing stone instead of just adding more for existing roads. Saves money, Skid Loader mounted Vibratory plate tamper for compaction and longevity. As a former paving contractor in Northern Virginia I have looked at the professionalism of the work from local paving contractors and have two that I sub out my paving to. We do the prep wo they can just drop their leeboy and pave. Typically saves you 5-6\$ per ton for your driveway or commercial parking lot. We have our own CAT milling machine and will do the cut ins at curbs or concrete garage floors ahead of time. Also to save money we are able to get asphalt millings from the plant as an alternative to gravel and works very very well as a base for asphalt entrance roads and driveways.

Culvert Pipes

Got Erosion? Culvert pipe installation or removal and replacement- We have a fast method using our trencher and skid loader bucket to install culvert pipes, so there is no excavator rental line item unless its a 2 ft + diameter culvert, then we grab a mini excavator.

Drain Tile

Got wet basement or back yard? We install drain tile to drain off excess water from wet areas on commercial and residential property, we are fast and efficient and do make calls to miss utility to avoid headaches and utility issues. We also do this around houses where basements are leaking to dry out the basement. And we can repair cracking concrete or block basement walls for you and treat the surface with moisture block. for the most part we use drain tile to dry up wet areas in parks, on school grounds and residential yards. Again making quick work of these jobs with

skid mounted trencher..

Brush mowing & tree removal

Got Bush? We utilize our heavy 6 ft brush mower to clean up heavy brush (treelings up to 3 inches in diam- we can cut it up and haul off property.) We also have an experienced tree climber to do topping, limbing and removal of trees. We have a farm in dinwiddie who allows us, without cost to dump 7-8 foot sections of trees which we haul with a dump trailer. We use a root grapppler to unroot and remove tree roots as long as we are not talking redwoods and we have a stump grinder when necessary. We do this efficiently and then regrade the area and compact & seed for grass when necessary.

Concrete Demolition and hauling.

We run a heavy skid loader mounted concrete breaker and can break up and remove old sidewalks parking lots and other concrete structures. We can remove old decks as well and haul debris to dump.

Parking Lot maintenance- Commercial and neighborhood homeowners associations & Security systems for entire neighborhoods and parking lots.. night vision direct police interaction.

3 Items here- Street sweeping and clean up with 72 inch Paladin sweepster, with internal dust pan to load up all your glass, rocks, cig butts, bottle caps and other ghetto debris. Makes huge difference especially on really bad parking lots. AND Commercial Light pole repair or remove and replace for damaged poles up to 45 ft high. We replace bulbs as well and keep a stock of high efficient LED bulbs that allow us to remove the transformers, further saving you money on light maintenance and energy. We install commercial and street lights including forming up concrete base for the poles. We are ALSO a registered dealer and installer

for LVT neighborhood watch and commercial parking lot security systems, Solar powered, SSL secured data directly to the cloud and your computer with license plate recognition technology and speed detection and control technology. Free 2 week trials and free training for those in need of more security.

Privacy fencing install or remove replace

We use skid loader mounted auger and have our private source lumber mill fence manufacturer in Prince George to cut out the middle men (lowes/ home depot) for privacy fencing to save you money unless you are in a hurry. We are fast and competitive on price.

We have partners that do Roofing and Siding and have great prices and are professionals under our license.

RVA Construction will also empty out old barns and storage units and haul away when needed. When We form up and pour concrete pads for storage buildings. We just want to stay busy and do good work. :-)

Foreclosure Clean-up(out) & Detailing quick prep for Realtors & Banks/ Mortgage Lenders.

REO Realtors: We will remove and dump everything from foreclosure properties, abandoned apartments or wholesale properties you need to have prepped for potential buyers viewing. We can do a quick paint and flooring makeover as well. We have dump trailers, fast workers and strong backs. **Farms with junk in barns or outbuildings that need clean out,** we offer the same services.
